

TASHIRO WITHHOLDS RESULTS OF TESTS OF SEA WATER OF HAWAII

Noted Scientist, Before Leaving, Says He Must Work for Two Years More

Two years of patient research and experiments on sea water of the Atlantic ocean completed, and two more years of work remaining in making tests of water in other oceans, is the program outlined by Dr. Shiro Tashiro of the University of Chicago, who left here for Japan late yesterday on the Chiyu Maru, after making experiments with sea water around Oahu for the last 10 days.

"I found some very interesting water here, and I hope to make tests of the ocean around Hawaii when I return from Japan some time in December," he said a few minutes before the liner sailed. "On my way back from Japan I shall conduct experiments on shipboard, with specimens of sea water taken from the ocean between Yokohama and Honolulu."

Grateful for Attention.

Concerning the results of his experiments here, Prof. Tashiro said he could not yet make any announcement, as he had not finished the necessary computations. "I wish you would express my appreciation to your civic and governmental bodies here for their cooperation in making working conditions easy. The boards of agriculture and forestry, the Promotion Committee and other organizations have assisted me in every way possible, and I am deeply grateful. Everyone treated me very nicely, and I obtained results much quicker than I expected," he said.

Dr. Tashiro has made his experiments here with a portable apparatus much simpler and easier to move about than his equipment at the University of Chicago. "My simpler apparatus enables me to get the same results, and as it is lighter, can be taken from place to place and used on shipboard," he added. "I have checked it up with the other, and it gives the same results precisely."

The eminent scientist is performing his experiments under the auspices of the Carnegie Foundation to determine the present gaseous condition of sea water. When these are completed, the groundwork will have been laid for studies of the biological relation of sea water to the human blood.

After taking tests of South Pacific sea water, Dr. Tashiro will next year go to India for tests of Indian Ocean water. He is conducting his experiments each summer, his winters being devoted to lecture work in the biochemical department of the University of Chicago.

Owing to the Chiyu's crowded condition, Prof. Tashiro was not able to secure regular accommodations on the big liner, but through the courtesy of the ship's officers he was assigned a berth in the officers' quarters.

CATS, WITCHES, PUMPKINS AND LANTERNS

HALLOWE'EN, OCTOBER 30

Everybody should see the big display of Halloween cards, favors, place cards, pies, clocks, rattles, hats, caps and everything to make the day what it is.

JAPANESE STUDENTS ENJOY MOVIES AND HEAR GOOD CONCERT

About one hundred Japanese students from the different public and private high schools of the city gathered at the Japanese Y. M. C. A. last night to attend the first of a series of student socials to be given by that organization.

The students were entertained with an interesting moving picture show and music by the Knights of Kamehameha, the musical club which has been so popular during the last few months. Ben Hosen appeared on the program with solos on the ukulele and a steel guitar solo.

The address of welcome was given by Dr. U. Kawaguchi. Responses were made by K. Watanabe, representing the Mills School students, by T.

Professor Shiro Tashiro.

MARKET BREAKS YEAR'S RECORDS OF STOCK SALES

All records for stock sales for this year have been broken during the last 24 hours, when a total of \$612 shares of sugar stocks changed hands—a figure exceeding by about 3000 shares the trading of the previous day. Between boards deals had by far the greatest volume, totaling \$197 shares, with only 415 shares sold at the call this morning.

Olas, McBryde, Onomes, Ewa, Pioneer and Waiakua are the market leaders in popularity, and all of those issues made advances over yesterday's closing prices, the advances being from 1-4 to 3-4, in the face of heavy profit taking which was supported by large buying orders, some for speculation and many for investment purposes.

PRESIDENT BACK OF SUGAR TARIFF REVISION

(Continued from page one)

Needs of the treasury for more revenue and the political effect in Louisiana, Colorado, California, and other "sugar" states are considerations in favor of modifying the schedule.

It is also reported that the administration is considering further slight tariff changes, to provide additional revenue, by increasing duties on liquors, and also possibly an extension of the income tax to smaller incomes.

The president is reluctant to repeal the "free sugar" provision for several reasons. One of these is the strong lobby already organized and working vigorously to that very end. Another reason advanced is that the president himself insisted, when the new law was being framed, upon the sugar tariff reduction.

L. Gonzola, the negro concerning whom Anna Parker yesterday delivered such an arraignment, stating that he makes her carry on her trade for his benefit, and commit all the crimes on the calendar from larceny up, in order that he may take a long rest in comfort—this same Gonzola, say the police, has won a great deal of fame in Honolulu as a champion at fancy and fast roller skating.

Shimizu of McKinley High School and T. Imai, the president of the Japanese Students' Alliance.

Have you a picture that you want to keep—a portrait that you are especially anxious to preserve? Take it to the Honolulu Photo Supply Co. They have a particularly choice selection of new frames and mouldings.

What is among the largest and most handsome collection of skirts ever displayed in Honolulu is to be shown next week at Whitney & Marsh's store. From dress to sport skirts the line is complete and up to date, and it will next week to visit their store during "skirt week"—the 11th to 16th.

FINDS OPIUM IN MANY FORMS IN WAIPAHU RAID

One of the richest opium hauls of the year was made by U. S. Marshal Smiddy late yesterday afternoon when he raided a combined gambling and opium joint at Waipahu and arrested Lee Chong, who now is facing a charge of having opium in his possession.

The defendant today was released on bond in the sum of \$500. A preliminary hearing of the case shortly will be held by U. S. Commissioner George S. Curry.

Included in the evidence taken by Marshal Smiddy was a one-pound can of what is known as second grade yeh shee, or opium ash, valued at about \$25. There was also a tin of first-class yeh shee and five tins each containing small amounts of the poppy drug.

In a large can was found six or seven lumps of "gum opium"—which, when mixed with water, makes an excellent smoking mixture, say experts. This gum opium is valued at about \$150. An apparently new tin of granulated opium, valued at about \$75, also was taken. In a glass there was a quantity of opium which, according to the marshal, had been mixed with lemon juice. There also was found a jar containing opium, a pipe, lamp and a variety of pipe-smoking utensils.

GIL ANDERSON WINS \$50,000 PRIZE AT SHEEPSHEAD RACES

(Associated Press by Federal Wire) NEW YORK, Oct. 9.—Gil Anderson today won the 350-mile auto race for the Astor Cup, and pulled down \$50,000 in prize money. The race was run on the Sheepshead speedway, the winner's time being 3 hours 24 minutes and 42 seconds, an average of 102.80 miles per hour, which constitutes a new world record. Rooney came in second and O'Donnell third. There were 20 starters in the race.

JUDGE WHITNEY LETS 31 YOUNGSTERS OFF WITH STERN WARNING

Thirty-two youngsters of all nationalities, who have been rounded up by Probation Officer J. Christian Anderson since last Wednesday, were before Juvenile Judge Whitney today on charges of truancy. With the exception of one, the boys were released after having been severely lectured by the judge. One of the youngsters was committed to the reform school, it being found that he was too much given to loafing.

"The truancy law is being enforced these days," remarked Officer Anderson. "If teachers excuse pupils to run errands, and the pupils have not

the proper excuse cards, I am going to pinch them for playing hooky."

PYREX

Glassware for Baking

The latest invention. A hit with housewives everywhere. No glass heretofore produced could withstand the sudden changes of temperature incident to baking. Glass is easy to clean and shows the slightest trace of dirt plainly if the cleaning has not been thorough. Glass does not flake or crack like many other kinds of ware.

Pyrex ware is for Quicker, Better, Cleaner, Cheaper Baking. It has been tested and approved by GOOD HOUSEKEEPING INSTITUTE. Made in Bakers, Custards, Pie Dishes, Bread Pans, Shredded Egg Pans, Casseroles, Etc.

It is now on display at

W. W. Dimond & Co., Ltd.
The House of Housewares
63-65 King St.
